DETAILED ACTION

Page 2

Response to Arguments

1. Applicant's arguments filed 12/5/2007 with respect to claim 27 have been considered but are moot in view of the new ground of rejection.

Information Disclosure Statement

The information disclosure statement filed 11/16/2007 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Specification

3. Amendment to the specification filed 12/5/2007 is accepted.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/627,055 Page 3

Art Unit: 2622

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

5. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Ogishi

Takeshi (JP 04-241586).

Regarding claim 27, Takeshi discloses a solid-state image sensor (abstract and

Fig. 1) comprising:

(a) unit pixels (Fig. 1), each of which has

(i) a photoelectric conversion element (photodiode PD in Fig. 1) for

converting incident light into an electric signal charge (see Fig. 1 and

abstract),

(ii) an amplifying element (source follower transistor Ta in Fig. 1) for

amplifying said electric signal charge of said photoelectric conversion

element and generating an electric signal,

(iii) a reset element (transistor Trs in Fig. 1) for resetting said photoelectric

conversion element (PD) in response to a reset pulse (sent from horizontal

scanning circuit 3 as shown in Fig. 1 and timing diagram in Fig. 3),

(iv) a select switch (transistor Tx in Fig. 1) for selectively outputting the

electric signal from said amplifying element to a signal line (Ls) as a pixel

signal (see abstract);

Art Unit: 2622

(b) a horizontal scanning circuit element (3) operatively connected to said reset element (transistor Trs) and said select switch (transistor Tx) and effective to generate and deliver said reset pulse and said select pulse (see Figs. 1 & 3), wherein, said horizontal scanning circuit element is effective to select said unit pixels arrayed one-dimensionally (see abstract and note in Fig. 3 that the horizontal scanning circuit 3 sequentially selects each column at a time, e.g., n-1, n, n+1 and so on, for outputting the signal charge to line Ls. Each column of pixels represents unit pixels arrayed one-dimensionally which is selected by the horizontal scanning circuit 3).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
